Pesticide Notice at Wolf Creek

A Minnesota state law is in effect that requires schools to inform school employees/students if they apply certain pesticides on school property.

Specifically, this law requires schools that apply these pesticides to maintain an estimated schedule of pesticide applications and to make that schedule available to employees/students for review. We do not currently have a schedule for insect pesticide use at Wolf Creek but if insects become a problem we will notify all staff/students that have complete the form below.

The lawn care schedule will involve an application of Momentum FX #2 on or about September 6, 2010 and an application of fertilizer to the lawn on or about October 15, 2010. Other applications in the spring will be sent via the notification system attached here.

State law requires that you be informed that the long-term effects on children from the application of pesticides are not fully understood.

If you would like to be informed of pesticide applications prior to applications please complete the form below if you wish to receive pesticide information from Wolf Creek for the 2010-2011 school year.

This notification is valid for the 2010-2011 School year only.

I am requesting to be notified of pesticide applications at the TRIO Wolf Creek Distance Learning Charter School campus located at 10363 Liberty Lane in Chisago City, MN.

I would like to be notified by Mail _____ Email_____
